

SABRE DATA INCIDENT NOTICE

Langham Hospitality Group was informed of a data security incident at Sabre Hospitality Solutions (“**Sabre**”), a third-party global reservations vendor, which may have impacted a subset of hotel reservations and guest information processed by Sabre. Sabre’s central reservations system serves a large number of hotel properties, travel agencies, online travel agencies, and other online booking services to make hotel reservations, including those under Langham Hospitality Group and other global hotel chains.

We understand that Sabre has engaged a leading cybersecurity firm to support its investigation. Sabre has confirmed that the issue is now contained and that unauthorized access to their system was stopped. Sabre also indicated that they have notified law enforcement and payment card brands about this incident.

If you made a reservation or used a travel agent, online travel agency, or other online booking services to reserve a stay at any one of the hotels under Langham Hospitality Group between 10 August 2016 and 9 March 2017, please visit the following Sabre website – www.sabreconsumernotice.com – for more information about the Sabre data incident.

Langham Hospitality Group values its relationships with its guests, and the privacy and protection of their information is a matter that we take very seriously. We recommend that our guests remain vigilant for fraud and identity theft by regularly reviewing account statement and monitoring free credit reports for any unauthorized activity. If there is any suspicious or unusual activity on accounts, affected individuals should report it immediately to their financial institutions or local law enforcement authorities.
